

## **Governor's Comedy Club's Covid 19 Protocol & Response**

Touchless hand sanitizing stations by every door including any and all doors leading in and out of clubs. Bathrooms and kitchen areas as well as stock areas and offices.

Auto anti-bacterial soap dispensers and paper towels in bathrooms

All High touch areas such as door handles, bar railings and front desk will be constantly sprayed and monitored by our safety porter.

Tables and chairs will be disinfected and wiped down before and after show.

Mic coverings will be given to every performer. As you come to the club the comedians temperature will be taken and they are handed a mic covering as you enter stage you put covering on mic and you exit your set you take off the covering and discard in pail in our Green room.

Our green room will have no more than two people at any time. No guests or family members are allowed in Green room. The Green room will be attended to and disinfected thru the night by our safety porter.

No food is allowed in green room. Bottled water only, and in sharpie, have the comedian label their bottle.

For contact tracing purposes every employee will fill out a form every night and their temperature will be taken and recorded on that piece of paper. They will also be given paperwork to ask them if they see deficiencies in our protocol and if they feel safe in the environment we have created, so that we can constantly improve our standards.

Customer's temperatures will be taken upon entry. This will be told to customers verbally if making reservations via phone. This will be posted on website for reservations made on line.

Floor to ceiling clear Plexiglass surrounds every one of our indoor and outdoor stages

Plexiglass surrounds our bar area with enough space at the bottom to pass drinks under. No one but wait staff can be at the bar. No customers will be allowed to congregate at bar before or after show.

Our security team will space people properly upon entering and social distancing decals & markers are placed on walls inside and outside of club to avoid people standing too close to one another.

When show is over our security team will touch each table one at a time to let customers know when they can leave, to avoid any gathering or line at exit. MC will also announce this several times from stage.

Masks MUST be worn any and all times a customer is standing, waiting to sit or using a restroom. The only time the customer may remove their mask is when he/she is sitting.

Employees at all times will wear a mask and face shield

Tables will be placed 6 feet apart. Tables are to be left in the club with signs on them designating which table can be used and which cannot. Chairs associated with tables that cannot be used are removed from floor.

Our food will be covered with Plastic plate coverings as it is walked into dining area. It is only to be uncovered once it is at the table.

Paper table coverings are placed on each table in use and they are to clearly state the day and time so that customers know that the paper covering is brand new and only used once and discarded.

Liquor bottles in speed racks and behind bar are to be disinfected every before and after every show. Spraying with an alcohol based product.

Drink trays are disinfected before and after every show with an alcohol based product.

Only groups arriving together can be seated together. If customers want to sit together the reservation must be made that way. This will also be posted on our website.

Kitchen will be disinfected every night after kitchens have been closed for night adding with an alcohol based product.

HEPA filters are installed throughout each club and will be constantly running from the entry of the first employee, thru each show and until the last employee leaves. This will filter the air while people are in club.

After HEPA Filters are turned off UV Germicide lights located throughout club, bar area, in kitchen areas and offices will then be turned on throughout clubs to “scrub” surfaces and air for an hour each night.

Once a week all three clubs go thru a rigorous “deep cleaning” with our disinfecting fogging machine that is run over all surfaces, high touch areas, tables, chairs, door handles, food areas and prep stations, kitchen equipment, bar area and bathrooms.

Our Covid 19 response and protocols have been applauded by our local Fire Marshall and Fire Inspector and also the presiding health departments. News 12 has done a televised tour of our clubs touting our safety procedures.
